Builder and product leader with 15 years of experience across AI, platform, SaaS, and API products. At Egen, led product management and delivery for custom AI agents incorporating RAG, MCP, and tool use, measuring and iterating on performance with evals. Rolled out enterprise-wide Gemini Enterprise and no-code agent deployments and led change management. At Gracenote, managed and grew product portfolios of up to \$150M in revenue, strategized and launched new API, SaaS, and data products, and led product teams of up to 13, including three managers. Extensive hands-on experience with Claude Code and Codex.

Professional Experience

Egen Solutions

Product and Service Delivery Director

September 2022 - June 2026

- Led product management and delivery of AI agents, including requirements definition, prompt and context engineering (RAG, MCP, and tool use), and evals and metrics, using orchestration frameworks like Google ADK and Microsoft Agent Framework.
 - SaaS Q&A and risk analysis: Planned and managed implementation of agents to answer user questions and flag risks introduced into legal documents, using evals to iterate and improve correct responses from 65% to 95%.
 - Branded content generation: Delivered production agent that reduced content development cycle time by >80% and improved SEO and other content metrics.
 - Data enrichment and curation: Prototyped an enrichment agent that improved metadata coverage and reduced manual curation time for biotech research data.
- Analyzed agent performance using evals, dashboards, and tracing. Drove prompt, tool, and data improvements to increase agent reliability.
- Owned agent accelerator work to deliver:
 - Voice agent accelerator using Gemini Live, including out-of-the-box demo workflows, automated infrastructure provisioning, metrics, and evals.
 - AI analysis toolkit for large-scale cloud migrations that automated infrastructure footprint assessment, initial migration planning, and scope estimation.
 - Internal RAG framework, improving time-to-deployment of RAG-enabled agents for enterprise clients by up to 60%.
- Delivered a Gemini-based vision and document-processing workflow that improved accuracy on handwritten data from under 50% to 90% while reducing solution complexity.
- Rolled out Gemini Enterprise platform to automate workflows across product support, HR, finance, and go-to-market, achieving over 90% adoption among eligible client employees.
- Turned around a stalled enterprise R&D data catalog platform, built POCs for internal customers, and achieved buy-in from cross-functional senior leadership and 6 product/engineering teams.
- Collaborated with clients to define AI and data governance guardrails, including data privacy, usage norms, and PII-redacted logging.

33 Teams

Product Management Consultant (Contract)

November 2021 - June 2022

- For a growth-stage fintech client: Analyzed product requirements and quality practices and recommended improvements. Managed decomposition of a legacy monolith into microservices.

Gracenote (Nielsen subsidiary)**SVP, Product Management**

May 2019 - April 2021

- Managed an \$80M Audio data-product portfolio and a team of 11.
- Launched our podcast metadata product for search and discovery, going from plan to release in 9 months. Supported sales in closing several multi-million-dollar enterprise deals.
- Delivered music and radio APIs powering search, matching, and enrichment.

VP, Product Management

March 2015 - April 2019

- Grew Video data-product revenue organically from ~\$100M to ~\$150M by extending global coverage and API delivery, achieving adoption by 80% of our largest customers.
- Managed a global product team of 13 and recruited and developed top performers to multiple promotions.
- Led expansion into SaaS workflow and business intelligence tools, including launching Nielsen Fan Insights and a new version of Studio System Enterprise.

Pivotal Labs**Manager, Product Management**

April 2014 - March 2015

- Managed a team of 4 product managers while coaching client product stakeholders through hands-on, paired product development.
- Led product management and delivery of a unified document management SaaS product as part of an integrated product, design, and engineering team.

Tribune Media Services**Director, Product Management**

February 2012 - April 2014

- Managed streaming-video data products and APIs and achieved over 80% YoY revenue growth.
- Partnered with sales to win new deals and renewals at major accounts.
- Led cross-functional assessment of a company-wide ID strategy to increase industry adoption and data network effects.

Education**MBA**, Georgetown University (#1 in class)**BS, Computer and Information Science**, University of Maryland**BS & MS, Structural Engineering**, Stanford University**Selected Side Projects**

[Homeschool Tools](#) (2026): AI-assisted curriculum dataset ("Rotten Tomatoes for homeschooling") with MCP-based agent access, web grounding, and evals, built with Claude Code. Over 1,000 monthly visitors.

[Build By Right](#) (2026): Integrated zoning and construction-cost dataset for parcel ROI analysis for real estate developers, built with Claude Code.
